

Press Release

BeanAir releases a new variant of its SmartSensor product range: BeanDevice AX 3D 13G Wireless Sensor Networks

Paris, France – September 15, 2011- **BeanAir** announced the latest version of its SmartSensor product range. The BeanDevice AX 3D 13G with a measurement range of 13G and also incorporates an onboard DataLogger for a greater performance altogether. The Non-Contact Actuation system aids you to quickly install your system and get it going! The BeanDevice AX 3D 13G provides as a great solution for dynamic measurements on embedded equipment, vibration analysis, movement & shock detection, structural health monitoring and more.

BeanAir®, a French manufacturer of smart “Plug and Play” Wireless Sensor Network (WSN) dedicated to industrial machine monitoring, embedded measurement, engineering structure & building management system, isolated sites & harsh environment. **BeanAir®** provides wireless sensors for both dynamic measurement (vibration, shock and deformation) as well as static measurement (temperature, humidity, tilt, binary and analog measurement). Its wireless technology has a very high availability rate in harsh environments.
