

Press Release

BeanAir announced the BeanDevice SmartSensor AX 3DS for a varied measurement range of 2/4/8G

Paris, France – September 15, 2011- BeanAir announced a new version of the BeanDevice AX 3DS with a user configurable measurement range of 2G, 4G or 8G. The BeanDevice AX 3DS comes with an integrated DataLogger that can store up to 1,000,000 Data Acquisitions. Apart from its easy set up or install, the BeanDevice AX 3DS' Ultra-Low Power technology consumes only 28 μ A in Sleep mode making this device highly suitable for Shock Measurement, Vibration Analysis, Remote Maintenance and more.

BeanAir®, a French manufacturer of smart “Plug and Play” Wireless Sensor Network (WSN) dedicated to industrial machine monitoring, embedded measurement, engineering structure & building management system, isolated sites & harsh environment. *BeanAir®* provides wireless sensors for both dynamic measurement (vibration, shock and deformation) as well as static measurement (temperature, humidity, tilt, binary and analog measurement). Its wireless technology has a very high availability rate in harsh environments.
