

Press Release

**BeanAir introduces the all new BeanDevice SUN T with better accuracy for Medical & Laboratory Markets**

**Paris, France – December 3, 2011-** **BeanAir** launched its improved version of the BeanDevice SUN T with a greater accuracy ( $\pm 0.1^{\circ}\text{C}$  between  $-10^{\circ}\text{C}$  and  $+5^{\circ}\text{C}$ ) and high precision probe. The new BeanDevice SUN T is highly adaptable for the Medical & Laboratory markets. It has an outstanding wireless range and a great battery autonomy which makes it ideal for monitoring purposes in laboratories, hospitals, cold chains and more. A COFRAC (calibration) certification is available on request. Its maintenance free enclosure and an Ultra-Low Power battery Consumption makes it a trouble free performer for years once installed. Plug & Play concept of the BeanDevice Wireless System is easy to install and you can get the device working in minutes.

*BeanAir®*, a French manufacturer of smart “Plug and Play” Wireless Sensor Network (WSN) dedicated to industrial machine monitoring, embedded measurement, engineering structure & building management system, isolated sites & harsh environment. **BeanAir®** provides wireless sensors for both dynamic measurement (vibration, shock and deformation) as well as static measurement (temperature, humidity, tilt, binary and analog measurement). Its wireless technology has a very high availability rate in harsh environments.
